
DENNIS ANTONIDA DIZON**FileMaker Developer / IT Specialist**

Princess Homes II Lot-1 Blk-1 Villa Kananga, Butuan City, Philippines

• 0909-599-4462 • dennisdizon@sfx.edu.ph

Professional Summary

Results-driven developer with **7+ years of end-to-end FileMaker application design** and more than a decade of IT infrastructure experience. Adept at turning complex business requirements into reliable custom apps, optimizing workflows, and integrating FileMaker with modern web services. Combines strong scripting and database design skills with expertise in network security and server management to deliver **high-performance, secure, multi-user solutions**. Leverage modern tools to fast track system developments.

Core Competencies

- **FileMaker Platform:** Pro/Server (v11–20), WebDirect, Data API, ESS/ODBC, relationship-graph optimization, custom functions, modular scripting architecture.
 - **Solution Development:** Requirements analysis, schema design, UI/UX prototyping, automated reporting dashboards, performance tuning, multi-device layouts.
 - **Integrations & Web Tech:** REST/JSON APIs, PHP & JavaScript in Web Viewers, cURL for external services, SMTP/SMS and SQL/MySQL integrations.
 - **Systems & Networking:** Cisco/Fortinet/MikroTik/Ubiquiti/TP-Link configuration, Windows/Linux server administration, virtualization (Hyper-V), cybersecurity best practices.
-

Professional Experience**Valdemer Resources, Inc. – Butuan City**

Senior FileMaker Developer / IT Specialist **2017 – Present**

- Using modern tools for **web-based Client Inquiry System** for centralized branch client and loan verification, syncs remote branches using cron jobs, mimics legacy application UI with data analytics.
- On-going development of Android app to facilitate loan CI/BI data capture and sync to centralized server for loan assessment.
- **Architected a suite of FileMaker business applications** managing inventory, sales, collections, purchasing, and HR workflows for 150+ employees, reducing manual data entry by **40%** and eliminating spreadsheet duplication.

- Built **automated lending and approval and notification system** using FileMaker Server Data API with RESTful endpoints and database & SMS API integration cutting processing delays by **30%**.
 - Implemented **role-based security model** with privilege sets, encryption at rest, and daily off-site backups to meet ISO 25010 parameters.
 - Migrated legacy databases to FileMaker 19, optimizing relationship graphs and scripts to improve average layout load times by **25%**.
 - Oversee all corporate IT operations: network design, enterprise-grade firewalls, Windows/Linux servers, and endpoint security.
 - Maintained 99% uptime through proactive server monitoring, automated backups, and disaster-recovery planning.
-

Education

Master of Science in Information Technology

Caraga State University – Butuan City

Bachelor of Science in Computer Science major in Information System

University of Cebu

Tertiary

Cebu City Don Carlos A. Gothong Memorial High School

Elementary

Butuan Central Elementary School

Certifications & Professional Development

- Claris FileMaker Certified Developer – in progress
 - Advanced FileMaker Scripting & API Workshop (Productive Computing University, 2025)
 - Cisco CCNA Routing & Switching (coursework completed, 2024)
-

Notable Projects

- Leverage vite coding by creating modern **Beach Resort Cottage Booking App** built with Next.js, React, Tailwind CSS, TypeScript, and Supabase-ready auth/database APIs.
- **Building and Maintaining Virtual Machines** (VMs) for application and database servers.
- **Real-Time & Scheduled SMS, email & MMS Alerts** – Integrated Globe M360 SMS API, SMTP API & Telegram API for instant & scheduled client and staff notifications from within FileMaker.

- **Human Resources Information System (HRIS)** – Comprehensive FileMaker solution for leave filing, medical reimbursement, performance evaluations, and payroll processing, streamlining HR tasks for 150+ employees.
- **Sales and Inventory Management** – End-to-end FileMaker application tracking sales orders, stock levels, and replenishment, providing real-time inventory visibility and automated low-stock alerts.
- **Billing and Collection System** – Automated invoicing, payment tracking, and aging reports, cutting collection follow-up time by 25%.
- **Request & Approval with Liquidation** – Workflow-driven app enabling digital requests, multi-level approvals, and expense liquidation with audit trails and attachment storage.
- **Centralized Lending with Remedial Module** – Unified platform for loan origination, credit scoring, payment monitoring, and remedial actions on overdue accounts, reducing delinquency rates.
- **Pawnshop Inventory System** – Custom FileMaker database to track pawned items, appraisals, and redemption history across multiple branches, ensuring accurate valuation and real-time stock reconciliation.

Technical Environment

FileMaker Pro/Server 16–20 • Windows Server 2016/2019 • MySQL/SQL Server • PHP • JavaScript • REST/JSON • Cisco/Fortinet/MikroTik/Ubiquiti/TP-Link
